OTHER CHARACTERISTICS

The one-piece seat model DROP without backrest, of glossy brilliant appearance, are made of high-density copolymer polypropylene, paste-coloured and enhanced with UV proof and fire-retardants substances.

Self supporting, they are provided with reinforcing ribs and small channels with holes for favouring rapid drainage of water.

They are extremely easy to fit: the one-piece injection moulded CETA seats, in fact, are placed directly on the tread of each terrace and fixed by using two galvanised steel expansion bolts protected by special non-removable caps. In this way the CETA one-piece seats cannot be removed and comply with all the most recent safety standards.

However, thanks to special steel frames, they can also be fitted on the riser: should the terraces have too low riser, the seats can be fitted on steel beams complete with uprights and special bases for fixing to the tread. All metal parts are supplied with hot – dip galvanising protection or (optional) epoxy powder paint protection.

Guarantee certification

CETA one-piece seats have Class 1 "Fire reaction" certification (according to the positive outcome of C.S.E. tests RF 2/75/A and RF 3/77 as per Ministerial Decree 26.06.1984, ordinary supplement to Official Gazette n.234 dated 25.08.1984). They also offered excellent results in weather and UV-ray tests, with more than 1000 hours subjected to the Xenotest, and to mechanical tests made by CATAS - Centre for Research and Development. They comply with EN 12727 Standards.

Seat number plate

The one-piece seats can be numbered (optional) with plexiglas plates fixed directly to the seats with a permanent holding device, the number being silk-screen printed and so indelible..

The color range

CETA one-piece seats DROP come in: red (RAL 3020), green (RAL 6032), yellow (RAL 1003) and blue (RAL 5010). Also available in other colours with minimum orders of 500 seats.
