OTHER CHARACTERISTICS

First Class and Top Class chairs are made from a strong steel core and upholstered with expanded foam: they are covered by a removable cover which resistant, removable fabric is **Class 1 IM fire retardant**.

Extremely elegant and comfortable, these appreciated chairs have separate seats and backs.

The tip - up seats make it easier for people to pass and involve an automatic spring device, or spring and gravity in the case of Top Class tip - up chairs.

Thanks to particular steel beams, "First Class" and "Top Class" chairs are normally fitted in groups on beams fixed to the floor or self - stabilising.

The beams are protected by special non-removable PVC caps. In telescopic stands the chairs are normally fitted to particular tip-up beams and so they disappear from view when the structure is closed. The steel parts are normally painted black with epoxy powders: on request they can also be supplied in other colours. "First Class" and "Top Class" chairs are supplied just when the ordered pieces are more than 50.

Guarantee Certification

CETA "First Class" and "Top Class" have **Class 1 "Fire reaction"** certification (according to the positive outcome of C.S.E. tests RF 2 / 75/A and RF 3 / 77 as per Ministerial Decree 26.06.1984, ordinary supplement to Official Gazette n.234 dated 25.08.1984).

Fabric

Practical and comfortable, the covering fabric is fully removable and **Class 1 IM Fire Retardant** certified.

Completely non- allergenic, it is also stain-proof and resistant to trichloroethylene, ethylene perchloride, acid and alkalis as well as to tearing and rubbing. In case of fire, it does not give off toxic gases and the fumes are white. A range of colours is available.

Seat number plate

The chairs can be numbered (optional) with engraved PVC plates fixed to the underside of the seat. Plates identifying the row or sector are also possible.
